

GoPro Hero Battery Replacement

In this guide, you will learn how to replace the battery of the GoPro Hero camera.

Written By: River Drake

INTRODUCTION

If for some reason your battery is dysfunctional, this guide will show you how to replace it.

TOOLS:

- [Metal Spudger](#) (1)

PARTS:

- [GoPro Hero Battery](#) (1)
- [GoPro Hero Rear Panel](#) (1)

Step 1 — Battery

 Power off your GoPro before beginning disassembly.

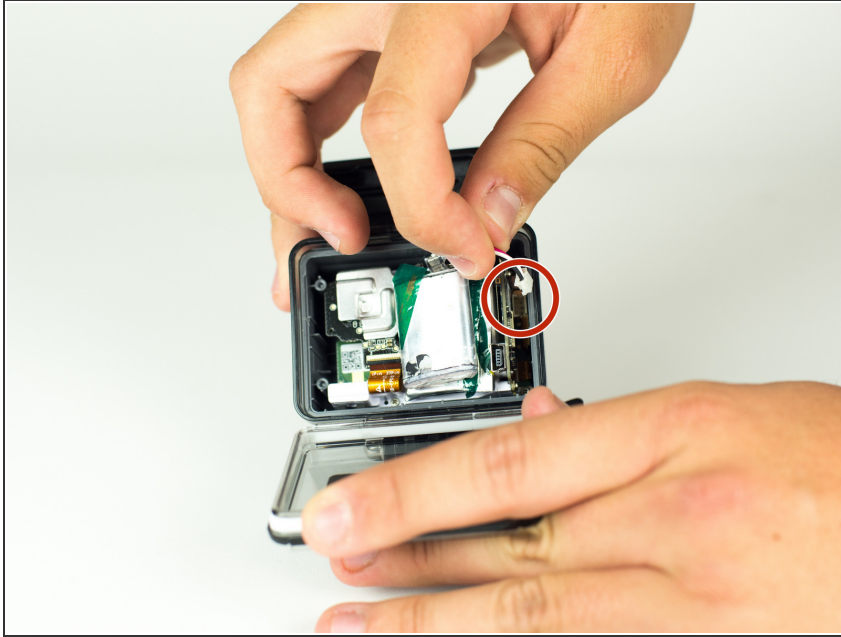

- Unclip the black latch to the camera case and open the case.

Step 2

- Gently pry the back open by inserting a metal spudger between the case and back panel.

Step 3

- Disconnect the battery from the motherboard by unplugging the red, white, and black wires from the white adapter.
- Use a plastic spudger to pry the battery off from the white plastic piece underneath.
- ⓘ The battery is glued to the plastic so some force might be necessary.
- ⚠ Be careful not to damage the battery to avoid releasing dangerous chemicals.

Step 4

- Remove the battery from the GoPro.

To reassemble your device, follow these instructions in reverse order.
